# 1. Test Summary

## 1.1 Scope of Testing:

The primary objective was to ensure the functionality, usability, and compatibility of the “Shufersal Online” website

This included testing the following main Modules :

- Sign up
- Login
- Search Box
- Search results accuracy for Supermarket category
- Filters of price and percentage of fat
- Delivery availability feature
- Shopping cart feature
- Main page features
- Branch Feature
- currency exchange
- Shufersal Travel
- Service customer
- supreme and personal information
- list and orders
- benefits and coupons
- technical support
- Security Issues
- Marketplace Feature
- lists and orders

Modules that was planned to be tested but did not:

- Accessibility
  - Categories: deals, nature health, pharma Cosmetics, all for home
  - download mobile version

### **1.3 Testing Environment:**

Tests were carried out on the “Testing environment” of the website, mirroring the production setup.  
Browsers included Chrome, Edge

### **1.4 High-Level Results:**

- A total of 543 test cases were executed:  
with 522 passing, 21 failing.

## **2. Testing Activities**

The Test Activities section details the comprehensive and methodical approach undertaken to evaluate the functionality and user experience of the “Shufersal online website”.

This phase involved a series of targeted tests types designed to rigorously assess each aspect of the website, ensuring reliability and quality from the user’s perspective.

The following Testing Activities were performed in this sprint/s:

### **2.1 Smoke Tests**

Over the course of the sprint, none of the instances were identified where the smoke tests failed,

### **2.3 Functional Testing**

all functional testing has been conducted, confirming that all features and modules are operating as intended.

Except for **1 open** bugs classified as '**High**' priority.

These high-priority bugs are being actively addressed now by development team.

### **2.4 User Interface Testing**

Our user interface testing has confirmed that the overall user experience

aligns with our company's high standards.

However, we did observe a **few minor glitches** in the rendering of pages on mobile devices, particularly in certain browsers, which the Development

Team

are now working to fix in order to optimize a smoother mobile user experience."

### **2.5 Exploratory Testing**

Approximately 95% of our testing efforts were devoted to Exploratory Testing.

**No major bugs were found in this process.**

### **2.6 Compatibility Testing**

During our compatibility testing, **0 critical issues emerged:**

**Firstly**, the website was found to operate significantly slower on the Chrome Browser.

**Secondly**, a major compatibility issue was identified with iPhones, where the website failed to function properly.

## **3. Results and Findings**

This section presents the key outcomes of our testing efforts on "Shufersal online website".

Here, we will present the important **metrics** that will highlight both the strengths and the areas needing attention.

These Metrics will provide a comprehensive understanding of the current state of the website's functionality, usability, and overall performance.

### **3.1 Test Execution:**

- **Executed:** 543 test cases (100% of planned)
- **Passed:** 522 (97.6%), Failed: 21 (2.4%)

### **3.3 Requirement coverage:**

- 100% of the requirements covered
